

# L RUBADARSHINI

DevOps Engineer | CI/CD Pipeline Development | Automation & Scripting

📞 9361213607 ✉️ rubaloganathan6@gmail.com 🔗 linkedin.com/in/rubadarshini-l-180702rdl 📍 Bangalore

## EXPERIENCE

### DevOps Engineer

#### Nextbrain Technologies

📅 Dec 2024 - Present 📍 Bangalore

- Engineered and optimized backend pipelines for real-time and historical stock market data, improving query performance and ensuring high data integrity.
- Developed scalable Python scripts applying OOP principles, creating reusable modules that reduced code duplication across projects.
- Implemented CI/CD pipelines in Azure DevOps, automating testing, deployments, and delivery processes to enhance release reliability.
- Migrated CI/CD workflows from Azure DevOps to GitHub Actions, improving build speed by 25% and enabling reusable, environment-specific automation.
- Automated system operations with Bash and Python, reducing manual intervention by 70%
- Monitored and maintained Linux-based servers, performing log analysis, uptime checks, and resource tuning to sustain 99.9% service availability.
- Integrated Prometheus & Grafana dashboards to monitor key system metrics, enabling faster root cause analysis.
- Enabled centralized logging by configuring Promtail + Loki with Grafana, cutting incident triage time in half.

### Intern

#### TATA ELXSI

📅 Jan 2024 - Jun 2024 📍 Chennai

- Developed and deployed a web application for internal operations, reducing manual processing time by 30%
- Automated data cleaning and analysis using Pandas, processing raw Excel files into structured insights

## EDUCATION

### Bachelor of Engineering

#### R.M.K.Engineering College

📅 Sep 2020 - Mar 2024 📍 Tiruvallur, India

## CERTIFICATIONS

- Python for Data Science (IBM)
- Microsoft Azure Essentials (Great Learning)
- Multi AI Agent Systems with crewAI (DeepLearning.AI)
- Machine Learning Operations for Generative AI (Google Cloud)
- Linux Networking Administrator (Alison)

## SUMMARY

Proactive Software Engineer with 1 year of experience in DevOps and Python development, expert in CI/CD pipeline development and cloud operations using Microsoft Azure services. My key achievements include migrating CI/CD workflows to GitHub Actions, improving build speed by 25%, and automating system operations, which reduced manual intervention by 70%. Passionate about driving scalability, reliability, and innovation in collaborative tech environment

## PROJECTS

### Generative AI Chatbot and Multi-Agent AI Systems

AI/ML projects focusing on GenerativeAI and chatbot development

- Built a domain-specific chatbot using LangChain, LangGraph, and Chroma with RAG pipelines, improving accuracy of responses
- Designed autonomous agent workflows with CrewAI and Phidata for task orchestration using Gen AI capabilities
- Applied advanced prompt engineering techniques and Pydantic-based validation to ensure reliable Gen AI applications

## SKILLS

|                          |                    |                 |
|--------------------------|--------------------|-----------------|
| Python                   | Azure Devops       |                 |
| GitHub Actions           | Docker             |                 |
| Bash Scripting           | Azure Services     |                 |
| CI/CD Pipelines          | Grafana            | Promtail        |
| Linux                    | Log Analytics      | Pandas          |
| MySQL                    | MongoDB            | OpenCV          |
| Microsoft Power BI       |                    | Azure Functions |
| Docker                   | Version control    | GenAI           |
| Multi Agent Architecture |                    | RAG             |
| crewAI                   | Prompt Engineering |                 |
